Experience

Senior Fullstack Javascript Developer

January 2021 - January 2024

- Joined as employee #10 and helped scale almost every part of our product
- Wrote the backend and frontend portion of many features, ranging from new onboarding experiences to complex challenges like a data analytics pipelines
- Wrote and maintained patches to `@playwright/test` to enable more advanced control of the library and add additional reporting features
- Shipped multiple new check types like heartbeat (cron) and multi-step API
- Created and published some tertiary projects such as a VSCode extension and a set of example Grafana Dashboards for customers
- Part of 24/7 on-call rotation
- Helped mentor more junior colleagues

Senior System Administrator

October 2017 - January 2022

- Created multiple custom fullstack web applications using mostly React / Next.js and Node.js on the backend
- Designed and Implemented our CI/CD system with Gitlab
- Built network automation workflows with Ansible and Netbox
- Deployed and maintained our virtualisation cluster using Proxmox

Junior Web Developer

June 2019 - September 2019

- Member of a frontend team developing a data heavy internal CRM -type application for Deutsche Bank. Our tech stack consisted of a PHP / MySQL backend, with React, Redux, and GraphQL on the frontend.

Education

Duquesne University

B.S. Information Systems Management, Sept 2010 - May 2014
